EXPERIENCE

(Full Time)

Software Engineer

2021 - Present

Larsen & Toubro Infotech | Pune, MH, India

Working as a Software Quality Assurance Engineer for three projects in this company. The project belonged to an MNC in Canada and the USA, who had outsourced their insurance software with us. My role was to test the defects in the product w.r.t to the requirements stated by the client and communicate my feedbacks to the developer. A typical day in this role includes, making test cases, manual testing the test cases, creating a test report, API testing and writing automated test script via Selenium if required.

EXPERIENCE

(Internships)

UI Designer (React Native)

May 2020 – July 2020

KubixSquare | Mumbai, MH, India

- The company was building a classroom product where my role was to build the frontend of the classroom app using React Native.
- Apart from this a video conferencing feature had to be integrated with the app, which was done using the Jitsi open source application configured on Unix server.

Web Developer

Dec. 2019 - March. 2020

Arezou Skincare | New Delhi

- Arezou is a personalised skincare brand which had the requirement to build a website where customer could book appointment and customise the product as per their needs. The frontend was build using HTML/CSS & JS.
- The client even wished to have an admin dashboard to manage the customer orders, employees and the inventory. This was made possible by integrating PHP in the project for interaction with the mySQL database.

Android Developer

June 2018 - July 2018

1024 Technocrats | Mumbai, India

- 1024 Technocrats is service based company, where my job was to help the team in their client's Android projects. Here I have learnt to design the UI for the apps using XML, write APIs for the app to interact the database, making connections to the database and all vital processes required in application development from the scratch.
